## **Astral Gnomix / Switzerland**

Born in 1977, Yan grew up in a small village in Ticino, this achieved the development of the energy he puts in his music. Familiarized with techno music in the mid 90's he started as a DJ in small Acidcore, Hardcore and Trance parties, including the legendary 2003 edition of "Castle of Mesocco".

Here he met an Italian friend who asked him to play in Firenze, where he was finally introduced to the magical world of synths. He immediately developed a passion towards electronic music devices especially towards analog synths, which allowed him to produce pure Psychedelic music. He then decided to create some serious Psychedelic Trance and it's from those vibes Astral Gnomix is born.

Astral Gnomix does not play common-style music, he has his own groove, born from a mixture of various electronic genres and goa, ranging from old-style to modern, inspired by acts like Hallucinogen, Oziric Tentacles, Cosmosis, Pink Floyd and more...

He presents a new style at each Live Act, and often brings along many of his original instruments, making each act impressingly particular. Now he spends as much time as possible playing his

instruments and composing new groovy stuff. Astral Gnomix is certainly not a common artist he loves psychedelic tunes, and does not follow the common wave...

For him psychedelia has no limits...
