## **Mida / Germany**

Mida's home was the Mondmilchbar in Zuerich (Switzerland), a former Goa temple during ancient times, which his psychedelic fundament is based on. Following Open Airs had a strong impact on his definition of good sound and the musical background of his father introduced him early to the world of synths and general midi.

In 2001 Mida settled down in Munich and connected immediately with the local scene there, resulting in his first records on the Munich based Spontaneous Aerobics Records.

His art studies at the University of Zuerich led to a deep understanding of dynamic which you will experience in his live sets: And they are really live:

Not a simple line of tracks, but a storrtelling live act woven for hours and arranged in realtime!

During this Sonic adventures which are unique (you will not hear a set of him for a second time) Mida is not stuck on a certain style, he spins his musical thoughts from Morning progressive based sound to more powerful Full on like night music full of melodies and magic...
